

Module 1: Introduction to Statistics and Descriptive Statistics

Module 2: Sampling

The set of videos on the above-mentioned modules were made by Academics from the Statistics sector of the School of Mathematics, Statistics and Computer Science at the University of KwaZulu Natal (UKZN) in South Africa.

Professor Delia North: Team Leader for the project.

Delia North is a Professor in Statistics and is currently the Dean and Head of the School of Mathematics, Statistics and Computer Science. She has over 30 years' experience in teaching Statistics and has become a leading figure in Statistics Education circles, nationally and internationally (Chair: South African Statistical Association Education Committee for 17 years; Vice President: International Association of Statistics Education; Master Trainer: Maths4stats for schools). She has received national and international awards for excellence in building capacity through advocating for studies in data analytics by holding fun activities and workshops for teachers and learners.

Nombuso Zondo, Arusha Desai and Danielle Roberts (from left to right) are three young lecturers in Statistics at UKZN who were on the video team for this project. They are currently busy with their PhD in Statistics and are making their mark at the institution and beyond as standout Statistics educators. They are passionate role models for young women in the "Women in Analytics" movement at their institution, where the team has created and trademarked the logo to show their commitment to this endeavour.
